SAMPLE PROJECT (PROJECT CAN BE ACCESSED AFTER SCANNING THE BARCODE):

	This is a VBA sample source code that initially designed to solve issue where manually extract attachment from outlook will be time consuming. Through using this code, it will help us to create folder in WIP, extract attachment in a new created folder with email subject title name.
	This is an Excel sample project that utilized excel formula to understand the relationship between changes in OPR, interest rate, MRTT coverage and risk exposure throughout the tenure. This project utilizes the time value of money to gradually reduce the total sum assured from 100% to 0%.
	This is a web base project that utilized JavaScript to build web base financial calculator.
	This is an Excel sample project that initially designed to allow credit analysis to be done in a more systematic manner, standardize quality and reduce rework in long run.
